Feel Free to Distribute With Your Friends. :-)

1-Google:

SEO Smart Links

2-Download SEO Smart Links

3-Read all the information that comes with SEO smart links

4-Got to your WP dash board > Plug ins > Add New > Upload >
Browse to where you chose to save the plug in > Click the plug in >
>Install now > Activate Plug in

5-Go to Settings > Smart SEO Links

Now you are ready to add your keywords.

6-Leave this tab open where it is and open a new browser

7-Go to Google External Keyword tool

8-Search for keywords related to your niche

9-Choose all that are relevant

10-Add to text file (you will want to save these)

11-Use Keyword Pad to put the keywords in
comma seperated form (keyword1,keyword2, etc)
[if you do not have it, use the link above to go to download page]

12-Export to clipboard > Paste into SEO Smart Links keyword window

13-After the last keyword, place a comma, then paste the affiliate
link you want to use to send visitors to your affiliate offering.

You can do this over and over with new sets of keywords and new urls should you want to do more than one.

BEWARE-This plug in will over ride other links in the content on your site!

Always be friendly to the authors who have created this content to you.

Always leave their links in tact.
